Experiment 11

Online Supermarket application

AIM:

To create a simple cloud-based Online Supermarket application using a Cloud Service Provider such as Zoho Creator to demonstrate SaaS, allowing customers to enter their personal details and select supermarket items with quantities.

Procedure

1. Open Zoho Creator and create a new cloud application.
2. Create an Online Supermarket form.
3. Add the required fields:

- Customer Name
- Address
- Phone Number
- Email
- Item Name
- Item Classification
- Quantity

4. Use suitable field types such as text, phone, email, dropdown, and number.
5. For Item Classification, create categories such as:

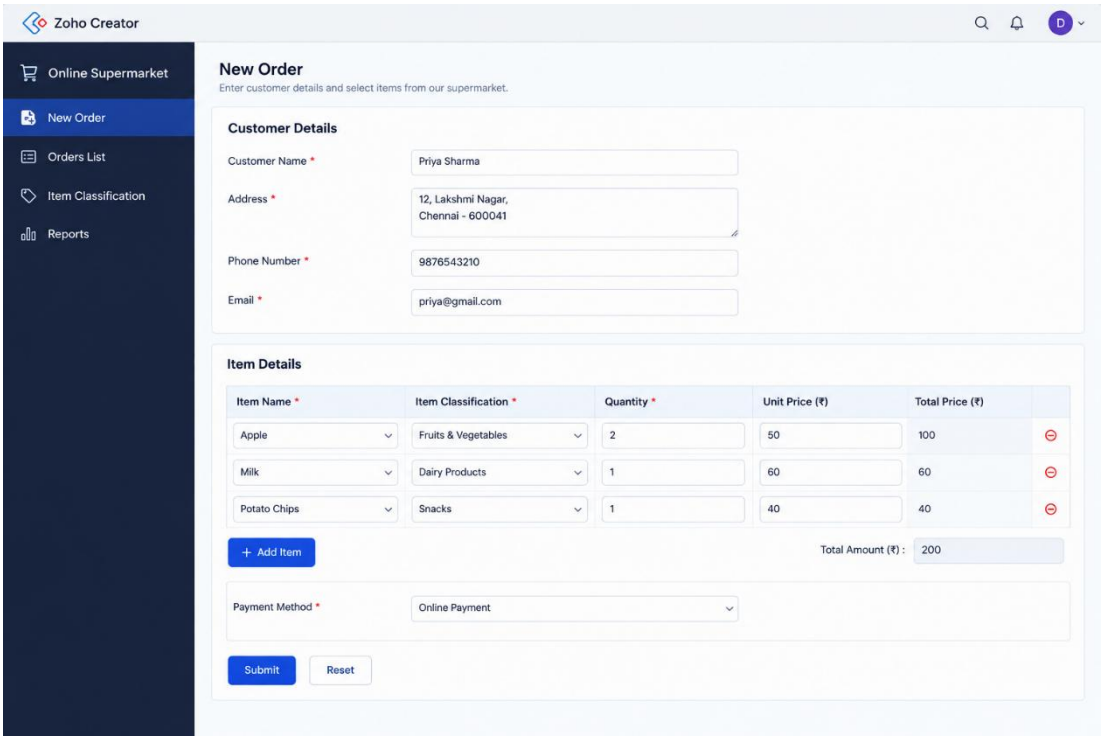

- Fruits & Vegetables
- Dairy Products
- Beverages
- Snacks
- Grocery

6. Personal Care

    - Enter sample customer and order details.
    - Save and submit the form.
    - View the submitted records in the Online Supermarket List to demonstrate cloud-based data storage and management.

IMPLEMENTATION

INPUT

OUTPUT

RESULTS

A simple cloud-based Online Supermarket SaaS application was successfully created. Customer details, item classification, and quantity were collected through the online form and stored as records in the cloud.
