CSA1507-Cloud computing and big data analytics
Experiment-7

Aim: Create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the students, course, present , Absent, course attendance, OD request, grade, attendance percentage, etc.

Procedure:

1. Sign in to a cloud service provider's low-code platform (Zoho Creator) and create a new application named "Student Attendance System".
2. Add a form named "Student Attendance" to the application; this form acts as the SaaS front end for faculty to record attendance online.
3. Add the "student name" field and the "Staff Name" field (First Name and Last Name), and mark them as mandatory.
4. Add the "Department" and "Session" drop-down fields and a "Date" field in dd-MMM-yyyy format.
5. Add the "Topics Covered" multi-line field to record the topics taught in each session.
6. Add the "Present Students" multi-select field containing the student IDs, so that attendance is marked for each session.
7. Keep the Submit and Reset buttons on the form so that faculty can save a record or clear the entries.
8. Create a report that lists all submitted attendance records in a table with the form fields as columns.
9. Store the records securely in the cloud database so that they can be accessed online from any web browser.
10. Run the application, submit sample records, and verify that they appear in the report and in the record Overview.

Input:

Output:

student name	Staff Name	Department	Date	Session	Topics Covered
Lucky Reddy	Gnana Soundari	Department2	29-Sep-2026	Session2	Payroll Processing
Surendar	Gnana Soundari	Department1	30-Sep-2026	Session1	Payroll Processing

Overview

student name	Surendar
Staff Name	Gnana Soundari
Department	Department1
Date	30-Sep-2026
Session	Session1
Present Students	Student1-ID Student2-ID Student3-ID
Topics Covered	Payroll Processing

Add a comment

Result:

The Cloud-Based Student Attendance System was successfully developed and deployed as a SaaS application. The system allows faculty to record Present and Absent status, manage OD requests, and maintain student details such as name, course, grade, and attendance percentage.
